MADE FOR TREK & TRAVEL

INTRODUCING
FREEDRY COTTON
EXCLUSIVE DRYING TECHNOLOGY

FreeDry™ is Eddie Bauer's new exclusive line of moisture management fabrics. The natural example–FreeDry Cotton–utilizes microfiber technology that dissipates moisture and dries two times faster than traditional cotton. The multi-component construction wicks moisture rapidly from your skin during heated activity to facilitate cooling, with yarn-specific properties that never wash out. This active transport also enables every piece constructed with FreeDry Cotton to shed moisture rapidly after a dip in the stream or a wash in the sink, making it the smart textile choice for extended trips.

QUICK DRY
FreeDry cotton absorbs less moisture and won't oversaturate during activity due to the perfect blend of treated and traditional cotton yarns, enabling it to dry at least 50% faster than either untreated cotton or technical synthetics.

MOISTURE WICKING
FreeDry utilizes one-way moisture transfer, surface dissipation and quick-dry performance to create a highly efficient three-dimensional approach to moisture management that moves sweat actively and directionally away from skin.

A-D | NEW SOLSTICE LINE
Start with the fabric. A soft, light, warm blend of polyester, merino wool, and spandex. Soft and flowing, it can go casual or dressy. But what really sets it apart is what we call FreeDry™ technology, which makes the fabric wrinkle-resistant, moisture-wicking, rated with UPF 50+ sun protection, and machine-washable. The result is high-performing, easy-packing, great-looking clothes for travel or daily use.
